

Concerning the emergency rotation in a foreign department the following viewpoints are basic requirements:

1. The hospital should be a teaching facility (including the emergency department).
2. For in field experiences students have to join to an ALS-unit.
3. The certificate should include some emergencies, the student really was present and participated at the patient's assessment and management ("Comments on the participated at the patient's assessment and management ...")
4. The certificate should clearly reflect the place of the practice that is the emergency dept. of the hospital or the ambulance service (or both).
