

SIXTH YEAR'S ROTATION SCHEDULES FOR 2007/08 - DRAFT

IMPORTANT NOTES:

- Rotations can be done **only at University Departments or Teaching Hospitals**. Letters of acceptance must be presented and accepted by the concerned SOTE Departments **in advance** for any practice to be done outside Hungary.
- The following rotations must be done at Semmelweis University:
 - Pediatrics - 2 weeks
 - Neurology - all 4 weeks!!!
- Family Medicine cannot be done at the end of the year at Semmelweis University.
- Students can pay their tuition fees in 2 parts. The first amount must be paid until the end of July, the second amount until the end of December.
- Students completing all the rotations outside Hungary (except for Neurology and 2 weeks of Pediatrics) can apply for a 20% tuition fee reduction after having presented all acceptance letters. The reduction will be deducted from the 2nd part of your tuition fees.
- Final exams are either in the last week of the rotations or during the week after. **Please note** that you are only entitled to pass the final exam in the last week of the rotation if you have a **permission (=valid exam application on NEPTUN)** to do so. In this case - and **only in this case** - it is enough for the hospital to certify a week less of the rotation. **Signup for the exams: via the NEPTUN SYSTEM.**
- If you have any problems regarding rotation courses in the NEPTUN, or exam dates, **you have to contact the concerned department(s)**.
- "**Student Handbooks**" (**logbooks**) are downloadable from the new website - www.semmelweis-english-program.org. You can find them under "Other menu/Clinical Rotations". You can log in by typing your NEPTUN User ID in BLOCK CAPITALS both in the "User name" and in the "Password" box. These handbooks must be filled in during the practice and signed and stamped by the hospital (Professor in charge/ Head of the Department).

PROGRAM #1	SURGERY 9 weeks (2 weeks Traumat.) M. 2 weeks Jan 07 - 18 '08	PEDIATRICS 8 weeks Jan 21-Mar 14 '08	SURGERY 9 weeks (2 weeks Traumat.) Mar 17-May 16 '08

There seems to be a possibility for an early rotation in Neurology between 28 May and 22 June, 2007. Only those will be allowed to take part in it who will have passed the 5th year's Neurology semi-final by that time and are in the first 30-35 students achieving the best results at the semi-final. The final exam can be taken only after the completion of the 5th year!!! Because of the early rotation, there will be fewer places given for the July-August Neurology rotation. (Please note, that it is only a possibility, which is still under consideration.)
